Prashanth Kumar Kadasi

Data Engineer | Data Modeling, ETL Orchestration & AI Systems

Hyderabad, Telangana, India | +91-9948311964 | kprsnt@live.com

Portfolio: **https://kprsnt.in** | GitHub: **https://github.com/kprsnt2** | LinkedIn: **https://linkedin.com/in/prashanth-kumar-kadasi-b5281765**

TECHNICAL SKILLS

- **Data Engineering & Warehousing:** BigQuery, SQL, ETL Orchestration, Data Modeling, Data Quality & Validation, Data Pipeline Maintenance, Scheduled Queries, BigQuery Notebook, SQLite
- **Languages:** Python (Pandas, NumPy, PyTorch, FastAPI), SQL, TypeScript, JavaScript, Node.js, HTML
- **Cloud & Orchestration:** GCP, Cloud Run, Docker, GitHub Actions, Vercel, Linux/Bash, Git
- **BI & Analytics:** Looker Studio, Tableau, Google Apps Script
- **Agentic & AI Systems:** Multi-Agent Swarms, FastMCP (MCP), Tool/Function Calling, Long-Horizon Agent CI/CD, Human-in-the-Loop Escalation, Bounded Autonomy, Hash-Chained Audit Ledgers, Scope Guardrails, Budget Enforcement, RAG

PROFESSIONAL EXPERIENCE

Black Piano — Data Analyst / AI Systems | *Remote* **Mar 2026 – Present**

- Develop, maintain, and optimize data pipelines using SQL, BigQuery, and Python (Pandas, NumPy) to transform raw data into analytics-ready datasets.
- Implement Data Quality & Validation checks and Scheduled Queries in BigQuery to maintain reliable source-of-truth data models.
- Deploy automated pipeline workflows and staging environments using BigQuery Notebook, GCP, Cloud Run, Docker, and GitHub Actions CI/CD.
- Integrate agentic AI capabilities using Tool/Function Calling, FastMCP (MCP), and Human-in-the-Loop Escalation with strict Scope Guardrails for automated data verification.

Pi Software Solutions (Pi - Datametrics) — Data Analyst | *Remote* **Mar 2023 – Feb 2026**

- Engineered and maintained 18 ETL pipelines, managing end-to-end data extraction, transformation, modeling, and loading into BigQuery.
- Built and maintained 10+ client dashboards and produced 30+ client reports using Looker Studio and Tableau for business teams and external stakeholders.
- Authored complex SQL scripts, BigQuery Scheduled Queries, and Google Apps Script routines to curate tables and support data science reporting.
- Executed Data Quality & Validation routines and Data Pipeline Maintenance to resolve schema anomalies and ensure metrics consistency across systems.

FEATURED PROJECTS

JobAgents — Data Sourcing & Deterministic Scoring Pipeline | https://job.kprsnt.in

- Built an autonomous data processing pipeline in Python (zero external dependencies, stdlib only) across 47 recorded runs, tracking 334 companies.
- Ingested and normalized 7,613 jobs (5,854 distinct roles) across 10 sources, collapsing 1,759 duplicate postings into curated data records.
- Staged and scored 22,839 match scores (0 model calls) with deterministic evaluation, identifying 155 matches above score threshold 65, including 2,662 remote roles (35% of total).
- Implemented data validation invariants achieving 0 failures (every check fires when violated) and an anti-fabrication guard catching 8/8 seeded fabrications.

mSeat — Candidate Analytics & Allocation Modeling

- Built transformation and data modeling pipelines for datasets spanning 18,000+ candidates across 59 colleges.
- Optimized storage and processing formats to achieve 90.6% compression while preserving full data structure.
- Validated allocation prediction models against cutoff benchmarks, ranking within 73 ranks of cutoff.

AgentSwarm — Autonomous Data Audit & Evaluation Harness | https://agent.kprsnt.in

- Orchestrated multi-agent analytical workflows across 34 runs, producing 520 artifacts across 9 research domains.
- Maintained immutable audit integrity with 35/35 hash chains intact and 0 oracle violations across 1,254 tool calls.
- Executed numerical audits verifying 22/25 claims exact to maintain ground-truth precision without human intervention.

EDUCATION

M. Pharmacy (Pharmaceutical Analysis & QA), JNTUH, May 2012
