Prashanth Kumar Kadasi

Data Engineer | Data Modeling, ETL Pipelines, SQL & Agentic AI

Hyderabad, Telangana, India | +91-9948311964 | kprsnt@live.com | **portfolio** | **github** | **linkedin** | **huggingface**

TECHNICAL SKILLS

- **Data Engineering:** SQL, Data Modeling, ETL Orchestration, Data Quality & Validation, Data Pipeline Maintenance, BigQuery, Looker Studio, Tableau, Scheduled Queries, BigQuery Notebook, SQLite, Google Apps Script
- **Languages:** Python (Pandas, NumPy, PyTorch, FastAPI), SQL, TypeScript, JavaScript, Node.js, HTML
- **Agentic & AI Systems:** Multi-Agent Swarms, FastMCP (MCP), Tool/Function Calling, RAG, Bounded Autonomy, Living Memory Compaction, Long-Horizon Agent CI/CD, Human-in-the-Loop Escalation, Hash-Chained Audit Ledgers, Scope Guardrails, Budget Enforcement, Model Evaluation & Steerability, Multi-Model A/B Evaluation, Prompt Engineering
- **Cloud & Infrastructure:** GCP, Cloud Run, Docker, GitHub Actions, Vercel, Linux/Bash, Git

PROFESSIONAL EXPERIENCE

Black Piano — Data Analyst / AI Systems

Remote **Mar 2026 – Present**

- Implemented data quality and validation routines for AI systems and pipeline workflows using SQL and BigQuery.
- Built structured data models and scheduled queries in BigQuery to evaluate model steerability and track analytical metrics.
- Utilized Python (Pandas) to transform and stage multi-source data, ensuring reliability for analytical applications.
- Deployed multi-model A/B evaluation frameworks and prompt engineering to standardize data quality and reporting accuracy across GCP and Cloud Run.

Pi Software Solutions (Pi - Datametrics) — Data Analyst

Remote **Mar 2023 – Feb 2026**

- Architected and managed 18 ETL pipelines, overseeing data pipeline maintenance, data modeling, and data quality and validation.
- Engineered 10+ client dashboards in Looker Studio and Tableau, converting raw multi-source data into core reporting tables.
- Produced 30+ client reports utilizing BigQuery, SQL, and BigQuery Notebook for cross-functional business analysis.
- Designed scheduled queries and automated ingestion pipelines using Google Apps Script and Python to stage data reliably.
- Collaborated with stakeholders to define source-of-truth data models and enforce consistent company data standards.

FEATURED PROJECTS

JobAgents — Autonomous Data Pipeline & Matching Engine (`job.kprsnt.in`)

- Built an automated data pipeline sourcing 7,613 jobs and 5,854 distinct roles across 10 sources with zero external dependencies (Python stdlib only).
- Engineered data modeling and deduplication routines merging 1,759 duplicate postings while tracking 334 companies and 2,662 remote roles (35% of total).
- Executed 47 recorded runs computing 22,839 match scores (0 model calls) deterministically, identifying 155 matches above score threshold 65.
- Enforced strict data validation with an anti-fabrication guard catching 8/8 seeded fabrications and 0 failures across review invariants.

mSeat — Data Validation & Ranking Engine

- Designed data compression and validation algorithms processing 18,000+ candidates across 59 colleges.
- Achieved 90.6% compression on data representation while validating ranking predictions to within 73 ranks of cutoff.

AgentSwarm — Autonomous Research & Audit Arena (`agent.kprsnt.in`)

- Deployed multi-agent systems across 34 runs and 9 domains, securing data integrity with 35/35 hash chains intact in an audit ledger.
- Enforced execution guardrails resulting in 0 oracle violations across 1,254 tool calls and 22/25 claims verified exact in numerical audit.
- Created evaluation harnesses independently re-running 195/224 passing agent-written tests.

AI Eco — Multi-Agent Tooling & Memory System

- Orchestrated 10 swarm agents integrating FastMCP across 15+ tools and 5 resources.
- Applied living memory compaction maintaining context bounds under <4,000 words, achieving an 83.4% fitness score.

EDUCATION

M. Pharmacy (Pharmaceutical Analysis & QA) — JNTUH, May 2012
