SUMMARY

AI/ML practitioner who architects production agentic systems end to end: multi-agent orchestration, tool/function-calling services over FastMCP, retrieval and ranking, LoRA/QLoRA fine-tuning, and the evaluation, guardrail, and hash-chained audit layers that keep non-deterministic workloads trustworthy. Backed by a GCP data-platform background in BigQuery, ETL orchestration, and enterprise dashboards; communicates architecture clearly to technical and non-technical audiences.
