TECHNICAL SKILLS

- **Data & Pipelines:** BigQuery, SQL, Data Modeling, ETL Orchestration, Data Quality & Validation, Data Pipeline Maintenance, BigQuery Notebook, Scheduled Queries, SQLite, Looker Studio, Tableau, Google Apps Script
- **Languages:** Python (Pandas, NumPy, PyTorch, FastAPI), SQL, TypeScript, JavaScript, Node.js, HTML
- **Cloud & Infrastructure:** GCP, Cloud Run, Docker, GitHub Actions, Vercel, Linux/Bash, Git
- **ML & Systems:** Multi-Model A/B Evaluation, Model Evaluation & Steerability, Bias Quantification, LoRA/QLoRA Fine-Tuning, FastMCP (MCP), Multi-Agent Swarms, RAG, Bounded Autonomy

PROFESSIONAL EXPERIENCE

Black Piano — Data Analyst / AI Systems | Remote | Mar 2026 – Present

- Architect and maintain cloud data pipelines and analytical processing workflows on GCP, Cloud Run, and BigQuery using SQL and Python (Pandas, NumPy, FastAPI).
- Implement data modeling and data quality & validation frameworks supporting downstream ML evaluation and feature inputs.
- Execute multi-model A/B evaluation and bias quantification workflows to ensure data integrity and observability across outputs.

Pi Software Solutions (Pi - Datametrics) — Data Analyst | Remote | Mar 2023 – Feb 2026

- Built and maintained 18 ETL pipelines using SQL, BigQuery, BigQuery Notebook, Scheduled Queries, and Google Apps Script.
- Developed canonical data modeling, data quality & validation routines, and ongoing data pipeline maintenance for mission-critical datasets.
- Created 10+ client dashboards across Looker Studio and Tableau, supporting 30+ client reports with high-reliability data feeds.

FEATURED PROJECTS

JobAgents — Data Ingestion & Automated Validation Pipeline (job.kprsnt.in)

- Engineered an end-to-end data pipeline ingesting 7,613 jobs / 5,854 distinct roles across 10 sources, executing 47 runs tracking 334 companies.
- Designed core data models and deduplication logic that merged 1,759 duplicate postings and indexed 2,662 remote roles (35% of total).
- Computed 22,839 match scores (0 model calls) with a score threshold 65, identifying 155 matches above threshold.
- Established data quality frameworks with 0 failures on review invariants; anti-fabrication guard catches 8/8 seeded fabrications with zero external dependencies (Python stdlib only).

BrandXY — ML Data & Evaluation Pipeline

- Developed data workflows for model steerability and bias quantification, evaluating GPT-OSS models (GPT-OSS 120B and 20B).
- Measured lift metrics of 76.5% vs 25.5% baseline (+51%) using base model GPT-OSS-20B on AMD MI300X.

rAsh Score AI — Multi-Provider Analytical Platform (rashscore.live)

- Built an analytical ingestion pipeline structuring data across 300 brands and 20 industry cohorts over 4 scoring dimensions (recommendation, sentiment, prominence, accuracy).
- Query aggregated across 4 providers (ChatGPT, Gemini, Claude, Groq) using Next.js, Turso/LibSQL, GitHub Actions, and Vercel.

mSeat — High-Volume Data Compression & Validation

- Developed data validation and compression pipelines processing 18,000+ candidates across 59 colleges, achieving 90.6% compression and validating predictions within 73 ranks of cutoff.

EDUCATION

Education: M. Pharmacy (Pharmaceutical Analysis & QA), JNTUH, May 2012
