Prashanth Kumar Kadasi

Senior Data Engineer | Data Modeling, ETL Orchestration & Data Quality

kprsnt@live.com | +91-9948311964 | Hyderabad, Telangana, India

https://kprsnt.in | https://github.com/kprsnt2 | https://linkedin.com/in/prashanth-kumar-kadasi-b5281765

TECHNICAL SKILLS

- **Data Engineering & Modeling:** BigQuery, Looker Studio, Tableau, ETL Orchestration, Data Modeling, Data Quality & Validation, Data Pipeline Maintenance, BigQuery Notebook, Scheduled Queries, SQLite
- **Languages:** SQL, Python (Pandas, NumPy, FastAPI, PyTorch), TypeScript, JavaScript, Node.js, HTML
- **Cloud & Infrastructure:** GCP, Cloud Run, Docker, GitHub Actions, Vercel, Linux/Bash, Git
- **Systems & Quality:** Hash-Chained Audit Ledgers, Bounded Autonomy, Living Memory Compaction, Tool/Function Calling

PROFESSIONAL EXPERIENCE

Black Piano — Data Analyst / AI Systems | Remote

Mar 2026 – Present

- Designed and maintained production data pipelines, structured data models, and scheduled queries using SQL and Python.
- Built automated data quality checks and validation routines to monitor ingestion integrity and capture transformation anomalies.
- Managed cloud workflows on GCP, Cloud Run, and BigQuery, orchestrating data updates while optimizing query efficiency and resource usage.
- Partnered across technical workflows to ensure dataset reliability, instrumentation consistency, and alignment with analytical requirements.

Pi Software Solutions (Pi - Datametrics) — Data Analyst | Remote

Mar 2023 – Feb 2026

- Built and operated 18 production ETL pipelines, modeling complex data into performant, query-ready datasets.
- Developed and maintained 10+ client dashboards in Looker Studio and Tableau to visualize operational performance and key business indicators.
- Authored 30+ client reports powered by scheduled queries and BigQuery notebooks, establishing rigorous data quality standards.
- Optimized SQL execution and warehouse queries, resolving data anomalies and improving reporting latency and pipeline maintainability.

FEATURED PROJECTS

JobAgents — Deterministic Data Sourcing & Pipeline Engine | job.kprsnt.in

- Architected a Python pipeline (zero external dependencies, standard library only) sourcing 7,613 jobs and 5,854 distinct roles across 10 sources over 47 recorded runs.
- Built automated deduplication and data-cleaning logic merging 1,759 duplicate postings into unified schemas, tracking 334 companies and 2,662 remote roles (35% of total).
- Implemented deterministic scoring architecture computing 22,839 match scores (0 model calls), surfacing 155 matches above score threshold 65.
- Enforced strict data validation with an anti-fabrication guard catching 8/8 seeded fabrications and review invariants maintaining 0 failures across all runs.

rAsh Score — Multi-Provider Analytics Platform | rashscore.live

- Built automated data collection and aggregation pipelines tracking 300 brands across 20 industry cohorts.
- Structured analytical models evaluating datasets across 4 scoring dimensions (recommendation, sentiment, prominence, accuracy) querying 4 providers (ChatGPT, Gemini, Claude, Groq).
- Implemented automated pipeline runs and deployment orchestration using GitHub Actions, Next.js, Turso/LibSQL, and Vercel.

mSeat — Large-Scale Data Allocation Model

- Engineered high-throughput data processing workflows analyzing 18,000+ candidates across 59 colleges.
- Built validation checks verifying predictive allocation accuracy within 73 ranks of cutoff while achieving 90.6% data compression.

EDUCATION

- M. Pharmacy (Pharmaceutical Analysis & QA), JNTUH, May 2012
