Prashanth Kumar Kadasi

People Systems Engineer | AI Integrations & Automation

Hyderabad, Telangana, India | +91-9948311964 | kprsnt@live.com

Portfolio | GitHub | LinkedIn

SKILLS

- **Integrations & Agentic Systems:** FastMCP (MCP), Tool/Function Calling, Multi-Agent Swarms, Human-in-the-Loop Escalation, Bounded Autonomy, Living Memory Compaction, Scope Guardrails, Budget Enforcement, RAG
- **Languages & Frameworks:** Python (FastAPI, Pandas, NumPy, PyTorch), JavaScript, TypeScript, Node.js, SQL, HTML
- **Cloud & DevOps:** GCP, Cloud Run, Docker, GitHub Actions, Vercel, Linux/Bash, Git
- **Data & Pipelines:** BigQuery, Scheduled Queries, ETL Orchestration, Data Quality & Validation, Data Pipeline Maintenance, SQLite, Looker Studio, Tableau
- **AI Platforms & Models:** Claude 4.x, Gemini 2.5/3.x, GPT-OSS 120B/20B, DeepSeek 4.1, Ollama, NVIDIA NIM, OpenRouter

EXPERIENCE

Black Piano — Data Analyst / AI Systems | *Remote* **Mar 2026 – Present**

- Build and operate automated data workflows and scheduled queries leveraging Python, SQL, and GCP (Cloud Run, BigQuery).
- Enforce data quality and validation routines across data flows to maintain system reliability and prevent schema drift.
- Implement scope guardrails, budget enforcement, and human-in-the-loop escalation mechanisms for autonomous processes.
- Write clean, maintainable automation scripts stored in Git, following continuous testing and peer review practices.

Pi Software Solutions (Pi - Datametrics) — Data Analyst | *Remote* **Mar 2023 – Feb 2026**

- Maintained 18 ETL pipelines with automated error handling, validation checks, and data pipeline maintenance.
- Built and published 10+ client dashboards and 30+ client reports utilizing BigQuery, SQL, Looker Studio, and Tableau.
- Created automated scheduled query jobs and extraction routines using Python, BigQuery Notebook, and Google Apps Script.
- Collaborated in an all-remote, asynchronous environment using Git for version control and change management.

FEATURED PROJECTS

AI ECO — MULTI-AGENT MCP WORKFLOW SYSTEM

- Built an autonomous multi-agent ecosystem with 10 swarm agents utilizing tool/function calling and bounded autonomy.
- Implemented a FastMCP (MCP) server providing 15+ tools and 5 resources for standardized model-context integrations.
- Enforced living memory compaction with a memory bound under <4,000 words, achieving an 83.4% fitness score.
- Integrated human-in-the-loop escalation patterns for safe and reliable execution across tool invocations.

JOBAGENTS — AUTONOMOUS SOURCING & API ORCHESTRATION | JOB.KPRSNT.IN

- Built an automated sourcing and deterministic scoring engine with zero external dependencies using Python standard library.
- Sourced 7,613 jobs (5,854 distinct roles) across 10 sources, collapsing 1,759 duplicate postings automatically.
- Ran 47 recorded runs tracking 334 companies and 2,662 remote roles, computing 22,839 match scores (0 model calls) and identifying 155 matches above score threshold 65.
- Embedded strict validation checks where review invariants had 0 failures and anti-fabrication guards caught 8/8 seeded fabrications.

MYLOCALCLI — MULTI-PROVIDER AGENT CLI | MLC.KPRSNT.IN

- Published public npm package `mylocalcli` (version 4.0.2) supporting 8 documented providers (Ollama, LM Studio, vLLM, OpenRouter, Groq, NVIDIA NIM, OpenAI, custom).
- Integrated 42 built-in tools, 38 dynamic skills, and 5 sub-agents for automated code review, test generation, and refactoring.

AWAKENING — LONG-HORIZON AGENT CI/CD

- Executed long-horizon autonomous workflows across 1,441 turns and 1,553 commits with multi-CLI orchestration.
- Maintained 100% CI integrity during a 330 turns API blackout utilizing independent verifier design and bounded autonomy.

EDUCATION

M. Pharmacy (Pharmaceutical Analysis & QA), JNTUH, May 2012
