Prashanth Kumar Kadasi

Quality Assurance Engineer | Test Automation, Root-Cause Analysis & Agentic Systems

Hyderabad, Telangana, India | +91-9948311964 | kprsnt@live.com

portfolio: **https://kprsnt.in** | github: **https://github.com/kprsnt2** | linkedin: **https://linkedin.com/in/prashanth-kumar-kadasi-b5281765**

SKILLS

- **Languages & Frameworks:** Python (PyTorch, Pandas, NumPy, FastAPI), SQL, TypeScript, JavaScript, Node.js, HTML
- **Testing & Security:** Source-Code Audit, Vulnerability Research, Proof-of-Concept Development, CVSS Scoring, CWE Classification, Scope Guardrails, Responsible Disclosure
- **Data & Infrastructure:** GCP, Cloud Run, Docker, GitHub Actions, Linux/Bash, Git, Vercel, BigQuery, SQLite, Data Quality & Validation, Data Pipeline Maintenance, Scheduled Queries, ETL Orchestration
- **Agentic & LLM Systems:** Multi-Agent Swarms, FastMCP (MCP), Tool/Function Calling, Long-Horizon Agent CI/CD, Living Memory Compaction, Human-in-the-Loop Escalation, Agent Evaluation Harnesses, Hash-Chained Audit Ledgers, Model Evaluation & Steerability, Prompt Engineering

FEATURED PROJECTS

JOBAGENTS — INVARIANT TEST FRAMEWORK & PIPELINE AUTOMATION

- Built a deterministic evaluation pipeline across 47 runs and 10 sources, computing 22,839 match scores (0 model calls) at score threshold 65 with zero external dependencies (Python stdlib only).
- Designed an invariant test suite achieving 0 failures, ensuring every check fires when violated.
- Validated regression prevention via an anti-fabrication guard that catches 8/8 seeded fabrications.

AGENTSWARM — AUTONOMOUS TEST & HARNESS VERIFICATION

- Executed qualification and test harnesses across 34 runs and 4 harnesses (agy, omp, pi, step) covering 520 artifacts.
- Triaged and validated agent-written test suites, verifying 195/224 passing tests independently re-run.
- Monitored tool execution logs across 1,254 tool calls, recording 0 oracle violations and verifying 35/35 hash chains intact.
- Conducted numerical audit procedures verifying 22/25 claims exact (audit verdict: B+ / not publication-grade without the numerical audit).

BUGAGENTS — VULNERABILITY RESEARCH & ROOT-CAUSE ANALYSIS

- Conducted root-cause analysis (RCA) and source-code audits across 22 hunt runs, 84 agent turns, and 15,317 tool calls.
- Identified, reproduced, and documented 8 findings (5 High + Critical, 3 Medium) spanning 14 classes (CWE).
- Tested edge cases and managed 34 filter refusals before 2 reports promoted for responsible disclosure.

AWAKENING — LONG-HORIZON CI/CD & RELIABILITY TESTING

- Tested long-horizon autonomous system execution across 1,441 turns and 1,553 commits.
- Validated system resilience during a 330 turns API blackout, maintaining 100% CI integrity.

PROFESSIONAL EXPERIENCE

Black Piano — Data Analyst / AI Systems | *Remote* **Mar 2026 – Present**

- Perform root-cause analysis (RCA) on production workflows and data pipelines using GCP logs, Python, and SQL analysis.
- Execute data quality & validation checks in BigQuery, maintaining scheduled queries and pipeline stability.
- Validate multi-agent orchestration and tool-calling execution to prevent drift and ensure deterministic outcomes.

Pi Software Solutions (Pi - Datametrics) — Data Analyst | *Remote* **Mar 2023 – Feb 2026**

- Maintained data quality, regression validation, and automated checks across 18 ETL pipelines using BigQuery and SQL.
- Investigated data discrepancies, performed initial RCA using developer tools and server logs, and resolved pipeline defects.
- Supported release qualification by maintaining data accuracy across 10+ client dashboards and 30+ client reports.

EDUCATION

- M. Pharmacy (Pharmaceutical Analysis & QA), JNTUH, May 2012
