SUMMARY

Data analyst owning production ETL pipelines, dimensional models, and data quality end to end. 18 ETL pipelines, 15+ enterprise dashboards, and 30+ client reports delivered; strong SQL plus Python (Pandas, NumPy, FastAPI) for transformations, validation, and automation. Independent work adds agent evaluation harnesses and multi-model A/B evaluation for lift measurement.

EXPERIENCE

Black Piano — Data Analyst / AI Systems | *Remote* **Mar 2026 – Present**

- Independently build and maintain 18 production ETL pipelines end to end — ingestion, SQL transformation, dimensional modeling, scheduled refresh — feeding 15+ enterprise dashboards and 30+ client reports with minimal oversight.
- Own data quality for the models I ship: validation checks, reconciliation, duplicate collapse, and root-cause fixes across sources; model and transform data in BigQuery, SQLite, and Google Sheets automation.
- Automate transformations and reporting in Python (Pandas, NumPy, FastAPI), replacing manual effort with scheduled, monitored jobs.
- Review code, share designs before building, and document reusable modeling patterns.

Pi Software Solutions (Pi - Datametrics) — Data Analyst | *Remote* **Mar 2023 – Feb 2026**

- Delivered SQL-based ETL and reporting for analytics stakeholders; modeled source data and validated outputs against business definitions.
- Built dashboards and recurring client reporting; translated business questions into data requirements with cross-functional partners.
