Prashanth Kumar Kadasi

Application Engineer | Python, SQL & GenAI Systems

Hyderabad, Telangana, India | +91-9948311964 | kprsnt@live.com | **portfolio** | **github** | **linkedin** | **huggingface**

TECHNICAL SKILLS

- **Languages:** Python (FastAPI, Pandas, NumPy, PyTorch), SQL, JavaScript, TypeScript, Node.js, HTML
- **Data & Databases:** SQL, BigQuery, SQLite, Data Modeling, Data Quality & Validation, ETL Orchestration, Data Pipeline Maintenance, Scheduled Queries, BigQuery Notebook, Looker Studio, Tableau, Google Apps Script
- **GenAI & Agentic Systems:** Tool/Function Calling, FastMCP (MCP), Multi-Agent Swarms, Prompt Engineering, RAG, Living Memory Compaction, Bounded Autonomy, Long-Horizon Agent CI/CD, Human-in-the-Loop Escalation, Independent Verifier Design, Multi-Model A/B Evaluation, Model Evaluation & Steerability, LoRA/QLoRA Fine-Tuning
- **Cloud & DevOps:** GCP, Cloud Run, Docker, GitHub Actions, Git, Linux/Bash, Vercel
- **Platforms:** Claude 4.x, Gemini 2.5/3.x, GPT-OSS 120B/20B, DeepSeek 4.1, Ollama, NVIDIA NIM, OpenRouter

PROFESSIONAL EXPERIENCE

Black Piano — Data Analyst / AI Systems | *Remote* **Mar 2026 – Present**

- Orchestrated and maintained 18 ETL pipelines using Python and SQL, enforcing data modeling, scheduled queries, and data quality & validation in BigQuery.
- Containerized application services using Docker and deployed cloud workloads to GCP Cloud Run with automated GitHub Actions CI/CD workflows.
- Evaluated GenAI tool/function calling, steerability, and prompt engineering strategies using multi-model A/B evaluation across Claude 4.x and Gemini 2.5/3.x.
- Automated data transformations and pipeline maintenance scripts using Python, BigQuery Notebook, and Linux/Bash.

Pi Software Solutions (Pi - Datametrics) — Data Analyst | *Remote* **Mar 2023 – Feb 2026**

- Delivered 10+ client dashboards and 30+ client reports utilizing SQL, BigQuery, Looker Studio, and Tableau.
- Designed relational data models and executed SQL scripts to ensure data validation, integrity, and reporting consistency across client datasets.
- Implemented automated data pipeline maintenance workflows using scheduled queries and Google Apps Script.
- Participated in Agile sprint cycles, conducting application debugging, SQL query optimization, and source control using Git.

FEATURED PROJECTS

JobAgents | job.kprsnt.in

- Engineered an automated data extraction and matching pipeline in Python using zero external dependencies (Python stdlib only).
- Ingested 7,613 jobs across 10 sources, collapsing 1,759 duplicate postings into 5,854 distinct roles across 334 companies tracked, including 2,662 remote roles.
- Computed 22,839 match scores (0 model calls) across 47 recorded runs, identifying 155 matches above score threshold 65.
- Implemented deterministic scoring and an anti-fabrication guard that catches 8/8 seeded fabrications with 0 failures.

mSeat

- Modernized and processed legacy relational datasets for 18,000+ candidates across 59 colleges.
- Applied SQL data transformations and schema validation, achieving 90.6% compression while validating allocations within 73 ranks of cutoff.

AI Eco

- Architected a multi-agent swarm system consisting of 10 swarm agents integrated with FastMCP (MCP) across 15+ tools and 5 resources.
- Established living memory compaction bounded to <4,000 words, reaching an 83.4% fitness score.

Awakening

- Directed long-horizon agent CI/CD execution across 1,441 turns and 1,553 commits with Git and GitHub Actions.
- Sustained 100% CI integrity across a 330 turns API blackout using bounded autonomy and human-in-the-loop escalation.

Geetha | geetha.kprsnt.in

- Built and deployed a full-stack search application indexing 700 verses using JavaScript, SQLite, Gemini AI, and Vercel.

EDUCATION

- M. Pharmacy (Pharmaceutical Analysis & QA), JNTUH, May 2012
