SUMMARY

Data analyst and AI systems builder who owns pipelines end to end: modeling, orchestration, validation, and the metadata that makes a warehouse legible to analysts and AI agents alike. Delivered 18 ETL pipelines, 15+ enterprise dashboards, and 30+ client reports.

EXPERIENCE

Black Piano — Data Analyst / AI Systems | Remote | Mar 2026 – Present

- Own 18 ETL pipelines (Python, SQL, BigQuery, Docker, GitHub Actions), moving client data into modeled warehouse tables with documented schemas, lineage, and naming standards.
- Deliver 15+ enterprise dashboards in Looker Studio and SQLite-backed marts plus 30+ client reports; turn ambiguous stakeholder requests into reusable models and defined metrics.
- Run data quality and validation gates before anything reaches a stakeholder, with hash-chained audit ledgers for lineage and reviewability.
- AI-native workflow: MCP tooling and Python automation for documentation, QA, and repetitive maintenance.

Pi Software Solutions (Pi - Datametrics) — Data Analyst | Remote | Mar 2023 – Feb 2026

- Built and maintained production SQL models and reporting pipelines for recurring client analytics; debugged and improved them as requirements and source systems changed.
- Partnered with stakeholders to define metrics, validate results, and standardize Google Sheets automation and data validation checks.

Education: M. Pharmacy (Pharmaceutical Analysis & QA), JNTUH, May 2012
